

# The Raymond Leader.

VOL 12.

RAYMOND, ALBERTA THURSDAY, FEBRUARY 14, 1913.

No 7

## Local News Items

The Golden Giant Mine is to be Saturday evening next, to be the benefit of our genial friend Will Selman Esq. who goes on a mission soon to New Zealand a long way off. Will's family accompanies him.

The Stake Presidency will likely go over to Lethbridge this week to look over some sites, suitable for the locating of the Latter Day Saints church at that place. We are reliably informed that the amount to be expended in the construction of the edifice will be less than \$100,000.

The Co-op Ranch southeast of Raymond and formerly owned by the Bornstedt Co. of Minneapolis was recently sold to a gentleman from Oregon for the sum of \$40 per acre. Mr. C. C. Stover, the Bornstedt manager is here from the States and closed the deal last Tuesday.

Magrath is soon going to have there big midwinter Poultry show and some fine prizes are to be given. Raymond's chicken men should get busy and collect a few of those prizes.

Mr. Mark Crossall was trying some new automobiles the other day and if the car agent is a good talker Mr. Crossall will tell you his farm is only three miles from town instead of eight.

Mrs. C. W. Card was out on Wednesday for the first time in three weeks having suffered with a severe cold and is gripped. Mrs. Card's many friends are glad to see her around again and hope she will soon have her regular strength back again.

Mr. J. F. Gordon of Raymond has resigned his position as manager of the Equity Lumber Co. and has gone to work with his brother R. J. Gordon of Lethbridge. Mr. R. J. Gordon is the Government Surveyor and no doubt this work will appeal to more Mr. Gordon than the lumber business. Mr. E. A. Stark who is president of the Equity Lumber Co. was put in as manager.

Mr. Geo. Wide home from a short trip to Utah where he was called a few days ago on account of his father's poor health. Mr. Wide says his father had two severe strokes which layed him up in bed but when he left his father was progressing nicely. Clinton Wide accompanied his father home after having spent some time in Provo.

It is in prospect that a conference train will be put on each quarterly Conference, for the accommodation of the people living at Grassy Lake, Purple Springs, Taber and Lethbridge. It will leave those points Friday morning and return Sunday evening. This additional business will mean another excess dividend on Canadian Pacific Stock.

A good example of what can be done at mixed farming, lies in a statement made by Prest. Allen, that two years ago he bought \$127 worth of hogs and now he has a carload ready to ship, which are worth about \$1,500, and that he has as many more left. Pretty good business that, out of \$127 in two years.

Should Temple Hill, or as much of it as will not be needed for the Temple Grounds, be cut up and sold in small lots, it would make the most desirable residence prop-

erty in Raymond. The fact that the Temple will most likely be located here should recommend this property to outside investors.

Everybody is cordially invited and specially requested to be present at the Opera House Saturday evening. The play is the "Golden Giant Mine" and is being put on for the benefit of Elder William Selman who leaves shortly for a mission to Australia. The play is a good one and all are sure of an evening's good entertainment. The prices have been cut down 15, 25 and 35cts, which we think will suit everybody. There will be a matinee at 2.30 admission will be 10 cts.

Raymond children are making their impress elsewhere than at home, as witness at a dancing and costume contest given at the Desert Gymnasium in Salt Lake there being four prizes offered, the children in Geo. H. Budd's family carried off three of them. Miss Catherine and Master Douglas winning the waltzing and little George coming with the prize for the best sustained character in costume, that of "Cupid".

The Stake Presidency during the quarterly conference at Raymond, discussed with the Lethbridge Ward Bishopric the proposed building of a Church for the Latter Day Saints at Lethbridge. A number of sites will be selected by the Bishopric and submitted to the Stake Presidency some time in the near future. The number of Latter Day Saint residents of Lethbridge is being constantly augmented, the Ward now being in the neighborhood of a couple of two hundred. Lethbridge is recognized as a place of future importance as a residential center for the Latter Day Saints so that some pains will be taken to get a suitable location.

## SCHOOL HONORS.

This list of pupils from grade VIII, obtained passing marks in the December examinations. The names are written in order of merit. Dollie Everson was the only pupil who attended school 201 days or every school day last year. Wendolyn Bryner. Mattie Laycock. Ina Burr. Maggie Holmes. Lyman Redd. Nora Anderson. Flora Anderson. Amy Neel. Melvin Fulmer. Rowena Hickern. Rena Vance. Mattie Card. Retta Fawns. Emma Vance.

## Our Foreign Interests

A stockholders meeting of the Ellison Milling and Elevator Co. was held at Lethbridge on Monday last, and a number of our local capitalists went over to attend it. Among them were such prominent gentlemen as B. J. W. Ryans. Asst. Mgr. J. B. Ellison and President L. D. King. It is understood that some extensive improvements are under contemplation in the Company's plant in Raymond, to keep pace with their expanding business here, and as to Lethbridge, the plan for discussion will be the doubling of their capacity at that place.

## A Marriage of Convenience.

A Marriage of Convenience by Mr. Waller and his excellent company, was a most delicate and excellent performance. Mr. Waller is a finished actor and Miss Titheradge was a charming comedienne. Candide, Marion, the maid, gave a perfect description of what a confidential was expected to be during the period of French history depicted in the play. The rest of the support was very capable. The costumes ranged through the grades of correctness, from the very simple to the extravagantly rich. Miss Titheradge's gowns, as the management promised, were to the ladies, dresses, but to a husband who had to pay for them, they were better described as nightgowns. Mr. Waller's company played to a capacity house, and the beauty and chivalry of Lethbridge were abundant in ermine and feathers, the chivalry being modestly hidden behind expansive shirt fronts and tulle skirts. The performance was a rare treat and the audience a critically appreciative one.

## A Narrow

## Escape.

John Holme a member of the Chicago Press Club in the South Clark Street Police court to-day described his sensation while being shaved by a madman. He also told how his ready wit and nerve prevented his throat being cut by Perry K. Hall, the barber in the case who is employed in a North-Western street. Holme says there was no doubt of Hall's homicidal tendency. The first Holme knew of the mental state of the barber, he says, was when Hall leaped over him after lathering his face and whispered:

"I could cut your throat now and nobody would blame me, would they?" "No," Holme says he replied, repressing his desire to spring from the chair, "but we have been friends long for that."

Then he told several jokes and shaving was well under way before Hall again recalled his desire for blood by remarking as he shaved his victim's chin:

"Now how easy it would be to slit your windpipe. One slash and then the end." "Yes but it's Monday and an unlucky day," urged Holme "Wait till I come in to see you next week."

Hall agreed to this, and the shaving was finished. Then Holme had the barber arrested.

Mr. Geo. Budd was confined to his bed last Saturday and Sunday with lagrippe but is around again though he looks a little bit pale.

## Quarterly Conference.

The Quarterly Conference held here last Saturday and Sunday in point of members an enthusiastic attendance was present. This conference will pass into history as one of the most profitable since the organization of the Taylor Stake.

subjects. Reports were had from the travelling elders laboring in different parts of the Stake, among the items being the information that several hundred families had been visited, and that the elders had been received with uniform kindness, especially in Lethbridge where four elders are making a house to house canvass, not omitting even the business houses and office buildings. At the Sunday School session the audience was plentifully sprinkled with a heavy attendance of children, although the regular services were dispensed with. At priesthood meeting on Saturday evening instructions were almost wholly along practical lines. The fact that farmers should not devote all their energies to wheat raising. The wisdom of that advice apparent to day. Steam and gasoline as means of farm power were subjects touched upon, perhaps the most important. A word, substantiated statement being made to the effect that every farmer who had bought either steam or gasoline engines had done so at momentary loss. The programme at the Improvement Association's meeting on Sunday evening was a most enjoyable one all of the members and exercises being of a high class and not easily surpassable in any community. Throughout this conference will pass into history as one of the most profitable since the organization of the Taylor Stake.

One of the interesting items mentioned during the recent conference was that the mortality of the Taylor Stake was during 1912 but one third of one per cent which is exceptionally light. It would be difficult to find a community where the death rate is so low, the reason being the climate and temperate living.

## The Octoroon.

The performance of the old time play given on Saturday evening last at the Opera House, was a credit to the Second Ward Primary and those who took part in it.

Criticism of Amateur theatricals or rather comparisons of amateur theatricals with professional standards would be unjust as well as painful, and taking into consideration that for some of the players this was their first stage appearance, it was a very good performance. Mrs. Stella Galbraith has the instincts of an actress, and with practice and proper instruction she would be excellent. Mrs. Jos. Maudsley did an exacting part with nice fidelity. Miss Boyson possesses a good stage appearance and enunciates well and with successive effort will make a useful member of the theatrical community. Among the gentlemen Mr. Cliff shows superiority in that he has had experience denied the others. Mr. Alfred has almost an ideal appearance for McCloskey and capability that would fill the requirements of the role to a nicety with the development of his natural endowments. Mr. Skouson as George Buxton, showed care in preparation and delivery of his part. The performance and we are not surprised that Dora liked him because we all do. Mr. Harris as Pete, again evidences a long head because former work of this kind has given him a familiarity with its requirements lacking in some of the others. Mr. Stevens as the planter presented a good appearance and acted acceptably the indulgent father. Owen King as the auctioneer looked handsome but visibly shrank from knocking down a lady even for \$25,000. Ira Harris was bluff as Captain Ratts should be, and Bessie Cliff

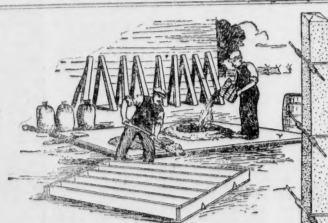

was sweet and distinct as Paul. The Indian's part was a savage rendition the the duet in which he was one of the principals being particularly thrilling. The minor parts were well done and the stage settings perhaps as good as the material they had at their disposal would permit of. It would be advisable that the services of the best dramatic instructor the community has, be secured in the production of a play as the educational value of dramatics is very great, to teach those taking part how to present a proper public appearance, as it is, in this community, one of the necessary features of practical education. Public appreciation was strongly in evidence and the house was full and the audience of course highly appreciative.

Once more the Stirling Basket Ball Boys trimmed the Raymond 2nd Ward in a good game last Tuesday evening on the Stirling floor. The winning of this game puts a "cinch" for Stirling on the pennant the stake board are giving and they are entitled to it too. There is one thing to commend in the Stirling Boys they are persistent workers and practice plenty which is one thing the Second Warders are lacking in.

According to the despatches England and Germany have reached an agreement that the ratio sea power shall be as 16 to 10. That is England is to have a navy a little more than half as large again as Germany. It is hoped that this compromise will enable these nations to maintain their places as world naval power without impoverishing themselves which is a step in the right direction.

Wanted - To rent 80 acres of good farming land in the vicinity of Raymond on the straight crop payment plan. Apply to The Raymond Leader.

A Little "Affair" was given by the Lethbridge Wagon choir on Tuesday evening of this week at which Misses Erna Karen and Dorothy Young sang a couple of selections each, which were very heartily received.

## Turn idle hours into concrete fence posts

EVERY farmer finds himself now and then with a few idle hours in which both himself and his help must look for "odd jobs" to keep them busy. Use these hours to make concrete fence posts. You can make a few at a time, storing them until needed. Then when you want a fence in the new field, your posts - existing concrete posts - are all ready to use. The making of fence posts is only one of scores of every-day uses for concrete on the farm described in the book,

"What The Farmer Can Do With Concrete"

NOTE - This 168 page book will be sent to you free upon request. You do not have to agree to use concrete or place yourself under any other obligation. Just send us your name and address. Advertisers.

Thursday, February 13, 1913

According to Bulletin No 30 of  
the Minnesota Farmers Library  
17 per cent. of the eggs produced  
in the State are lost through im-  
proper methods of handling and  
marketing. This means a loss of  
\$1,500,000 annually in the State  
of Minnesota. From one of seven  
causes of depreciation in values  
i.e., chick development an annual  
loss of \$5,000,000 occurs in the  
United States.

According to the figures of  
Packer Stockbridge, writing in  
the World's Work. The coop-  
erative stores in six States returned  
to their customers a profit of  
\$500,000 on total of \$7,000,000  
worth of business with a capital-  
ization of \$2,000,000. This a-  
mounted to a saving of eight per  
cent on the purchases of 20,000  
families, a very considerable  
reduction in the steadily ascend-  
ing cost of living.

While leaning over the side of  
a pig pen to get a good look at  
an especially fine porker in the  
on the farm of W. A. Hallam,  
Judge Charles V. Keeler, a noted  
poultry fancier, of Winamac, Ind.  
dropped his \$200 watch into the  
feed trough and a hog promptly  
swallowed it. The Judge then  
bought the hog for \$100 and shipped  
it to Winamac, where he will butch-  
er it and recover his watch. Keeler  
is the Judge who, while passing  
on the merits of a prize hen in a  
western show last fall, had the  
misfortune to have a large sized  
diamond pecked from his setting  
in a ring.

## FARM BOOK-KEEPING

One of the problems which  
makes farming unsatisfactory is  
the difficulty of working out a  
system for accounting sufficiently  
simple for the average farmer to  
keep and at the same time cap-  
able of showing the state of the  
business of the farmer and pre-  
senting a tolerably accurate es-  
timate of profit and loss, etc.  
This difficulty is in a large mea-  
sure met by the U. S. Department  
of agriculture with its Farmer's  
Bulletin No. 511, entitled Farm  
Bookkeeping. Several methods of  
farm accounting are discussed  
and illustrated from a simple an-  
nual inventory to more formal  
and detailed labor, crop, stock  
accounts, etc. The whole bulletin  
is written in a simple and attrac-  
tive style. A limited supply has

been secured and copies may be  
obtained upon application to the  
Secretary of the Department of  
Extension.

## Tragic Humor.

There is a story going the  
round illustrative of the situation  
as to the International Harvester  
Co. and the poor devils who have  
bought machinery of them. Some  
one asked an agent of The Har-  
vester Co. what they are going to  
do with Southern Alberta when it  
came into their hands, as it  
surely is doing, and he replied,  
"Oh we will just give it away to  
settlers who come in and then  
get it back again, by selling them  
machinery." He might have ad-  
ded, "it will be a cinch. The In-  
ternational Harvester Trust is  
only capitalized at \$40,000,000.  
A trust is defined as being a  
little bunch of money surround-  
ed by water.

The experience of some of the  
largest and most successful farm-  
ers in the district is to the effect  
that mares as motive power on  
the farm, are much more profit-  
able than machinery, as a witness  
the various kinds of engines  
both steam and gasoline bank  
into field corners where they are  
left to rot, the profit in them  
being in not using them.

An employee of the Harvester  
Trust Co. who attached a casting  
to an engine bought from The  
Trust, and for which a charge  
of \$22.00 was paid, volunteered  
the statement that such a casting  
(produced in quantities as it is)  
cost the Trust the magnificent  
sum of \$100.00. A margin of  
profit, this kind of large busi-  
ness has train robbery backed off  
the boards.

## "FARMERS!" Take Notice

The season for planting your  
spring crops is fast approaching  
and it is very important that the  
farmers give some serious con-  
sideration to the question of  
"what are the best crops to plant."  
In order to that next fall may find  
them not only reaping a crop but  
also reaping some profits on their  
summers work. In view of this  
condition I have no hesitancy in  
recommending them to raise a few  
sugar beets. For this farm com-  
munity there is a fixed price and  
the payment is certain. The  
farmer knows when he delivers  
his beets that every ton taken to  
the factory means five dollars  
for him and with an ordinary crop  
of ten tons to the acre it means a  
return of \$50.00 per acre. The  
expense of say \$30.00 per acre  
would leave a net return of \$20.00  
per acre. This expense if the  
work is done by the farmer and his  
children, will all come back to  
him in wages.

In addition to the yield of beet  
there is in the beet top an asset  
worth from \$5. to \$10. per acre  
especially to those who have  
cattle or hogs to feed. Hogs will  
get fat and cows will yield heavily  
in milk and butter if fed upon  
beet tops.

The land also left in excellent  
condition and if planted to grain  
will yield better results than grain  
planted upon summer-fallowed  
land. It would be a profitable  
thing for the farmers to haul a  
few loads of manure during the  
winter and spread it upon their  
beet land. Some farmers figure  
that they can make \$5 a day all  
winter hauling manure.
